Rätsch details the botany, history, distribution, cultivation, and preparation and dosage of more than 400 psychoactive plants. He discusses their ritual and medicinal usage, cultural artifacts made from these plants, and works of art that either represent or have been inspired by them. The author begins with 168 of the most well-known psychoactives --such as cannabis, datura, and

papaver--then presents 133 lesser known substances as well as additional plants known as "legal highs," plants known only from mythological contexts and literature, and plant products that include substances such as ayahuasca, incense, and soma. The text is lavishly illustrated with 797 color photographs--many of which are from the author's extensive fieldwork around the world--

showing the people, ceremonies, and art related to the ritual use of the world's sacred psychoactives. Emma is used to things going her way. Her father is headmaster of her prestigious boarding school, her friends take her advice as gospel, and she's convinced that a relationship

with her long-time crush is on the horizon. As it turns out, Emma hasn't seen anything yet. When she finds an old book in an abandoned library, things really start going Emma's way: anything she writes in the book comes true. But the power of the book is not without consequences, and Emma soon realizes that she isn't the only one who knows about it. Someone is determined to take it from her—and

they'll stop at nothing to succeed. A new boy in school—the arrogant, aloof, and irritatingly handsome Darcy de Winter—becomes Emma's unlikely ally as secrets are revealed and danger creeps ever closer.

 The value of nothing is explored in rich detail as the author reaches back as far as the ancient Sumerians to find evidence that humans have long

struggled with the concept of zero, from the Greeks who may or may not have known of it, to the East where it was first used, to the modern-day desktop PC, which uses it as an essential letter in its computational alphabet.

Regan Books  
This guide book to mathematics contains in handbook form the fundamental working knowledge of mathematics

which is needed as an everyday guide for working scientists and engineers, as well as for students. Easy to understand, and convenient to use, this guide book gives concisely the information necessary to evaluate most problems which occur in concrete applications. In the newer editions emphasis was laid on those fields of mathematics that became more important for the

formulation and modeling of technical and natural processes, namely Numerical Mathematics, Probability Theory and Statistics, as well as Information Processing. Besides many enhancements and new paragraphs, new sections on Geometric and Coordinate Transformations, Quaternions and Applications, and Lie Groups and Lie Algebras were added for the sixth

edition.

This biography of Gauss, by far the most comprehensive in English, is the work of a professor of German, G. Waldo Dunnington, who devoted most of his scholarly career to studying the life of Germany's greatest mathematician. The author was inspired to pursue this project at the age of twelve when he learned from his teacher in Missouri that no full biography of

Gauss existed at the time. His teacher was Gauss's great granddaughter, Minna Waldeck Gauss. Long out of print and almost impossible to find on the used book market, this valuable piece of scholarship is being reissued in an augmented form with introductory remarks, an expanded and updated bibliography, and a commentary on Gauss's mathematical diary, by the eminent

British mathematical historian, Jeremy Gray. *Handbook of Mathematics* Simon and Schuster Shortlisted for the CILIP Carnegie Medal 2010, Keith Gray's hit novel features a group of three friends who embark on a remarkable journey from Cleethorpes to Scotland with a stolen urn containing the ashes of their best friend... Now adapted for the stage by Birmingham Rep for a production by

their Youth Theatre in 2011, Ostrich Boys is ideal for KS3 and KS4 English and will appeal strongly to boys as well as girls. This educational edition in Methuen Drama's Critical Scripts series has been prepared by national Drama in Secondary English experts Ruth Moore and Paul Bunyan. Building on a decade of highly effective work and publications endorsed by

national organisations and supported by teachers and consultants across Britain, each book in the series: meets the new requirements at KS3 and GCSE (2010) features detailed, structured schemes of work utilising drama approaches to improve literary and language analysis places pupils' understanding of the learning process at the heart of the activities will help pupils to

boost English GCSE success and develop high-level skills at KS3 will save teachers considerable time devising their own resources.
