<p><u>Guide</u> Cisco Press Internetworking Protocol (IP) addresses are the unique numeric identifiers required of every device connected to the Internet. They allow for the precise routing of data across very complex worldwide internetworks. The rules for their format and use are governed by the Internet Engineering Task Force (IETF) of the The Internet SOCIety (ISOC). In response to the</p>	<p>exponential increase in demand for new IP addresses, the IETF has finalized its revision on IP addressing as IP Version 6, also know as IPng (ng = Next Generation). Key hardware vendors such as Cisco and major Internet Service Providers such as America Online have already announced plans to migrate to IP Version 6. IP address allocation within an organization requires a lot</p>	<p>of long-term planning. This timely publication addresses the administrator and engineer's need to know how IP 6 impacts their enterprise networks. In three example-driven sections—preparation, design, and maintenance—you'll learn principles and best practices for designing, deploying, and maintaining an address

plan far beyond what's possible with IPv4 networks. During the course of the book, you'll walk through the process of building a sample address plan for a fictional company. Enterprise IT network architects, engineers, and administrators will see firsthand how IPv6 provides opportunities for creating an operationally efficient plan that's scalable, flexible, extensible, manageable,

and durable. Explore IPv6 addressing basics, including representation, structure, and types. Manage risks and costs by using a three-phase approach for deploying IPv6. Dig into IPv6 subnetting methods and learn how they differ from IPv4. Determine the appropriate size and type of the IPv6 allocation you require. Apply current network management tools to IPv6. Use IPv6 renumbering

methods that enable greater network scale and easier integration. Implement policies and practices to keep IPv6 addresses reachable. *The TCP/IP Guide* Lulu.com Todd Lammle's focused, concise review guide, updated for the latest CCNA exams.
