This volume provides a novel approach to international relations. In the course of fifteen essays, scholars write about how life events brought them to their subject matter. They place their narratives in the larger context of world

politics, culture, and history.

Autobiographical International Relations believes that the fictive distancing associated with academic prose creates disaffection in both readers and writers.

In contrast, these essays demonstrate how to reengage the "I" while simultaneously sustaining theoretical precision and historical awareness.

Authors highlight their motives, their desires, and their wounds. By connecting their theoretical and practical engagements with their needs and wounds, and by working within the overlap between theory, history, and autobiography, these essays aim to increase the clarity, urgency, and meaningfulness of academic work. These essays are autobiographical, but focused on the academic aspect of authors' lives.

Specifically, they are set within the domain of international relations/global politics. They are theoretical, but geared to demonstrate that theoretical decisions emerge from theorists' needs and wounds. Theoretical precision, rather than being explicitly deduced, is instead immanent to the autobiographical and the historical/cultural narrative each author portrays. And, these essays are framed in historical/cultural terms, but seek to bind together theory, history, culture, and the personal into a differentiated and vibrant whole. This book moves the field of International Relations towards greater candidness about how personal narrative influences theoretical articulations. No such volume currently exists in the field of international relations.

Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and

bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. *Wake Up, Woods* showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of *Wake Up, Woods* will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.
